

Concurrent Enrollment: Supplementary Weighting Spring Billing and Verification

[Carla Schimelfenig](#)

Iowa Department of Education

June 2015

The Supplementary Weighting Calculation

- Course enrollment – from SRI Fall and Spring
- Weighting factor – determined by the community colleges
- Section FTE value for supplementary weighting – determined by the serving district (course instructional minutes / total instructional minutes in a year)
- Resident district's cost per pupil

Generating the Spring Supplementary Weighting Bills for Concurrent Enrollment

- Use Spring SRI certified data to generate the bill.
- Winter SRI is preliminary only and should **not** be used to generate bills
- SRI displays the attending district's course and student enrollment information.
- The Non-Fall Supplementary Weighting application is the resident district's view of the attending district's course and student enrollment information for open enrolled students.

SRI open enrolled in students' courses =
